

At Aristotelis we value the importance that all languages and cultures contribute to our society in Australia. Learning languages not only give us an insight into our roots but also enrich our minds.

Our aim is to foster and promote the Greek Language and Culture within New South Wales.

Our programme is tailored around the needs of second and third generation Australian students of Greek origin; however we welcome students of all backgrounds. The programme is based on the K-6 Curriculum provided by the Community Languages Department and the Department of Education of NSW

We use modern approaches to teach Greek as a second or foreign language through cultural topics, using textual, visual and audio means, in a fun and engaging manner.

And because education happens just as much at school as it does out of school we are committed to providing students and parents with additional resources via our online site providing the full service appropriate for teaching the Greek language.
